**Bios Japan V01 00 17 01 2000 Console 10000 Bin**

[Download](#)

---

Aug 8, 2546 BE - ... BIO scph10000.bin(4.0mb). In configure I set cdvdrom to cdvnull and BIO to Japan v01.00(17/01/2000) Console. Now I can install the Bios. After that I copy the Bios to one of my CD-ROMs and then to my CD-i-discs. First, I did the same thing with the BIOS to copy it to one of my CD-ROMs, but it doesn't work. I then set the CD-i-discs as the drive (i.e. CD-ROM) and they were all found. I then copied the Bios to one of my CD-i drives. After that I rebuilt the BIOS and the CD-i-discs. Now I can start the console, and when I boot the console, it works fine.
