My Code With Key [Win/Mac] [March-2022]

My Code is a nifty tool which helps you create and manage templates with the click of a button. What does that mean? On screen, you can create a simple or complex template that you can use later on in order to get things done. All the templates can be stored in one of three ways: In My Code, iMyCode or iMyCode Manager. Using your templates you can create some pretty cool stuff. With a few clicks, you can publish your favorite templates online and on your CD/DVD (or even in your folder / library), and others can access them. In addition, you can update your templates all via email, text, FTP or HTTP (SOCKS) in any of the three places. You can also attach your templates, as well as check your code status from anywhere in the world. My Code Features: The program is designed for the Microsoft Windows platform. The program generates and manages your templates in your My Code folder. All templates are accessed via drag'n'drop. Language support: Basic, Python, Perl, INI, JavaScript, Pascal, HTML, C#, PHP, SQL, CSS, Web and other. Support for Macromedia RoboHelp, Adobe FrameMaker, Adobe Acrobat, KOffice, KWord and GoAnimate. Easy to use and easy to learn. Support for management of templates (including remote access) via email, text, FTP or HTTP (SOCKS). You can also work with HTML templates. The program generates files (.JS,.PHP,.HTML,.ASP,.PY,.CS,.JSX,.WIZARD,.CSS and.FLOAT) Saves completed template code and works history. Can be used in modal mode. Program includes a help file (FAQ) with tutorial and user manual. You can save more than one template (using Files > Allow More Files in the Code Editor) Many other features and options.
