AutoCAD extensions can be either portable applications (e.g. Add-on Applications), plug-ins, or Autodesk Exchange Apps. Both portable applications and Autodesk Exchange Apps can be downloaded from the Application Store. Plug-ins can be developed using C++ and are distributed as shared libraries. Integration with other software AutoCAD integrates with other CAD packages through API and plug-in functionalities. Some of the main applications that can connect to AutoCAD are: AutoCAD-RAD Studio - Part of the new Autodesk all-in-one product suite, the AutoCAD-RAD Studio combines all the functionality of AutoCAD with that of other Cad design applications such as Windows Presentation Foundation (WPF), which runs on .NET. AutoCAD Exchange - Free and web-based eDiscovery, electronic discovery is the legal process of discovering and reviewing electronically stored information (ESI), including emails, text messages, instant messages, and documents, when litigation or law enforcement proceedings are involved. AutoCAD360 - An online collaborative version of AutoCAD. In addition, AutoCAD has an application programming interface that can be used by the third-party developer to access to AutoCAD functionality, using their programming language of choice.
